

NORTHERN AVENUE BRIDGE

Northern Avenue Bridge

- Located between the South Boston Seaport and Downtown
- Pratt trusses
- Triple barrel with a moveable swing span

The Charge of the Mayor's Advisory Task Force

Providing Design Guidance for:

- Honoring **History**
- Improving **Mobility**
- Increasing **Resiliency**
- Creating a **Destination**

Current Situation

- The bridge is closed to all traffic
- Considered to be structurally unsound
- Coast Guard informed the City it is a “hazard to navigation” due to the risk of it falling into the channel.

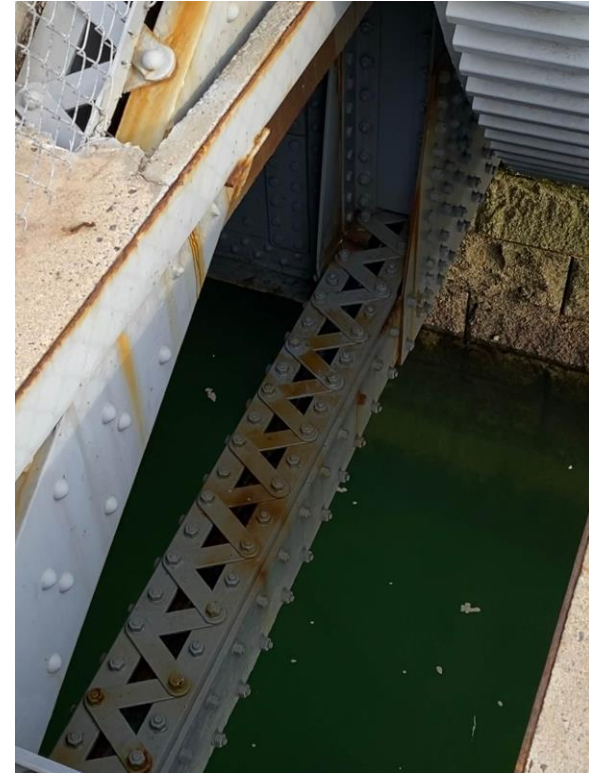

Recent Rehabilitation Example - Congress Street

- Originally built in 1930 and rehabilitated in 2008
- Using modern knowledge and technology while preserving the historic form
- It achieved a 2010 BPA preservation achievement award

Recent Rehabilitation Example - Congress Street
